Claim Rejections - 35 USC § 102

1. Claims 27-32,51,52 are rejected under 35 U.S.C. 102(b) as being anticipated by Silverstone (6161044).

As mentioned in the previous office action, Silverstone teaches a pulse generator connected to electrodes that are capable of producing a square wave signal. The phrase 'at least one neural image' is considered to not be a structural limitation. Further, how the stimulation sites are determined are also not structural limitations, but merely intended use. Similarly, the subject matter of claims 51,52 is considered to be intended use only.

2. Claims 1-12,43-46 are rejected under 35 U.S.C. 102(e) as being anticipated by Carroll et al (6937905)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

As mentioned above, the phrase 'at least one neural image' is not considered to be a structural limitation. Further, how the stimulation sites are determined are also not structural limitations, but merely intended use. Similarly, the subject matter of claims 43-46 is considered to be intended use only.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,3,4 of U.S. Patent No. 6937905.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the present application are considered to be obvious over the claims of the '905 patent. Where the electrodes are placed, in the present application claims, is not considered to be a structural limitation.

Allowable Subject Matter

5. Claims 13-26,33-42,47-50,53,54 are allowed.

Since new rejections have been made, this action is not made final.
